

Educational Seminars on **Diabetes** 2012

15-16

June 2012

“Macedonia Palace”

Hotel

«Alexandros I»

Hall

Thessaloniki

**5th Educational
Seminar**

Program

Introduction

The growing incidence of Diabetes Mellitus combined with the pace of scientific developments presents an urgent need for information that is aimed at providing the best care and management of people with diabetes.

Therefore, five educational seminars will be organized by the **Diabetes Association of Northern Greece in cooperation with Cambridge University** at the “Macedonia Palace” hotel in Thessaloniki and will cover the full range of modern developments in Diabetes Mellitus.

The seminars will address physicians who have an interest in Diabetes Mellitus and wish to be informed on the latest developments in Diabetology.

Experienced Greek and foreign experts in the field of Diabetes will give lectures and by taking advantage of modern developments in technology, those interested will be offered the option of interactive participation by monitoring the program which will provide them with the opportunity to question lecturers in both Thessaloniki and Athens simultaneously.

We kindly invite you to join us in order to truly enrich your scientific knowledge and experience. We hope that our ambition to provide a productive and creative series of educational seminars proves worthy of your expectations.

We look forward to your participation.

The Chairman of N.G.D.A.

Kyriakos Kazakos
